2094	Vegetable lard and margarine	1.34	

where U = the Soligo-Stern measure of the implicit rate of protection
and T = Power's own measure of protection.

The formulae are:

$$U_i = \frac{t_i - \sum_j a_{ji} t_j}{V_i / Y_i \cdot (t_i - \sum_j a_{ji} t_j)}$$

$$T_i = \frac{t_i - \sum_j a_{ji} t_j}{V_i / Y_i}$$

The t 's represent the proportions by which the system of protection permits the actual domestic prices of the outputs of various industries to exceed their free trade prices.

Y_i represents the output of any industry.

$\sum_j a_{ji} Y_i$ represents the intermediate inputs, valued at given world prices.

V_i represents the value added at free trade prices.

The computations however cover the post 1962 period, not the decade of the 1950's. Moreover, the tariffs were in large measure redundant; for example, food products, which were the largest part of industrialization, may seem to have enjoyed high nominal as well as effective protection. Yet prices of Philippine-made food items were and are lower than those of comparable products abroad. Other examples of locally-produced items where the tariff protection is redundant are soft drinks, soap, cigarettes,

margarine, tires, and many others. John H. Power, "Import Substitution as an Industrialization Strategy," Philippine Economic Journal, Vol. V, no. 2 (Second Semester, 1966), pp. 167-204.

Table I. GNP, Exports, Population, and Per Capita GNP
in the Philippines: 1947-1971.^{1/}
(selected years)

Year	GNP (million pesos)	Exports (million US\$)	Population ^{2/}	Per Capita GNP (pesos)
1947	4,166	---	18,781	222
1948	4,928	---	19,139	258
1954	8,226	400.5	22,868	360
1955	8,801	400.6	23,568	373
1960	11,229	560.4	27,088	414
1961	11,961	499.5	27,903	429
1965	14,734	768.5	31,417	469
1966	15,618	828.2	32,363	483
1970 ^{3/}	20,914	1,061.7	36,590	572
1971	22,272	1,136.4	37,691	591

^{1/}GNP is in million pesos at constant 1955 prices, per capita GNP in pesos, 1955 prices, exports in million U.S. dollars, and population in thousand persons.

^{2/}These estimates of population are based on the 1948, 1960 and 1970 censuses.

^{3/}Since 1970, the National Economic and Development Authority has published revised GNP data--using 1967 prices. For Tables I and II, the figures from the revised data have been deflated using the implicit price deflators of the Office of Statistical Coordination and Standards to give values in 1955 prices.

Sources: For 1947-1966, The Statistical Reporter, Office of Statistical Coordination and Standards, National Economic Council, Vol. XIII, No. 2, April-June, 1969 and Vol. XIV, No. 2, April-June, 1970.

1972	1,105.5 ^{1/}	37.02 ^{3/}	16.05	20.98	24.92	0.67	0.36
1973	1,886.3 ^{1/}	29.54 ^{3/}	17.97	17.78	29.92	4.72	0.07

1/ The data for 1973 are not strictly comparable with the previous series because beginning 1973, the Central Bank ceased the processing of data for exports and so the data for 1973 are those compiled by the National Census and Statistical Office. There were changes in coverage of the classifications; for example--the Central Bank used the net-value added approach i.e., excluded raw material imports for embroidery and for any industry that intended to re-export the finished products. The National Census and Statistics Office used the gross-value added approach.

2/ Agriculture includes the following: sugar (centrifugal); tobacco; fruits and vegetables; hides, skins, fur skins, undressed; oil seeds, oil nuts and oil kernels; cork; textile fibers not manufactured into yarns, thread, or fabric; animal and vegetable crude materials inedible; live animals, chiefly for food; pulp and waste paper; crude rubber including synthetic and reclaimed. Excluded are canned pineapple, desiccated coconut, copra meal or cake. These items are classified under manufactured articles, except as noted below.

3/ Including copra meal or cake, which were previously classified under manufactured articles.

4/ Minerals consist of metaliferous ores and metal scrap; mineral fuels, lubricants and related materials; crude fertilizers, minerals, except precious stones.

5/ Manufactured articles comprise the following items: sugar preparations; food and miscellaneous food preparations; beverages; chemicals; manufactured goods classified chiefly by materials; animal and vegetable oils and fats; miscellaneous manufactured articles; machinery and transport equipment; desiccated coconut; plywood and other wood manufactures.

6/ Unclassified items include fish and fish preparations; cereal and cereal preparations; meat and meat preparations.

Special transactions include articles temporarily exported, samples and articles for exhibit.

It will be noted that in 1973, returned goods and special transactions accounted for 3.59 per cent of total exports, compared to 0.09 per cent in 1972.
